

Woodstream Orchids Flask/Compot Listing November-December, 2016 New Paphs, Phrags, Epidendrums, Trichopilias

FLASKS AND COMPOTS

Our labs continues to run amuck (practice makes perfect)! We have Phrags, Paphs, and Epidendrums available, priced to move. Now is a great time to restock your seedling area with some exciting species and unique hybrids. The Phrags are super vigorous, and will be ready for 2" pots 6 months after deflasking! Not only have we have been pleased with the quality of the flasks that our labs produce, but also with the quality, health and fast growth of the seedlings, once they are planted out.

Flasks and community pots (compots) move quickly, and new flasks arrive almost every month. Due to the dynamic nature and relatively short "shelf-life" of flasks, these offers may be withdrawn at any time.

Seedlings may be shipped out of flask (except foreign orders) to prevent damage from jumbling inside the flasks. If in flask shipping is desired, shipping costs may increase (actual cost) and no guarantee may be made that the seedlings will arrive undamaged.

Woodstream is fortunate to have two dedicated labs operating for us. They are the engine of our enterprise.
